1. In response to Reference A, a study of aerial photography, (Reference B) was made in order to locate and identify Cuban Coastal Defense Craft within a ten nautical mile radius of La Isabela (22-57N 080-01W), Caibarien (22-31N 079-28W), and Nuevitas (21-33N 077-16W).

2. Numerous small craft were located in all port areas, however, the function of these craft could not be determined because no identifying signatures were evident which would aid in distinguishing a naval vessel from a commercial craft.

3. Forwarded for your retention are 3 annotated enlargements showing the location of the small craft in each port mentioned above.
